### Message from the Guest Editor

Dear Colleagues,

Recently, there has been a significant increase in the research of textile materials, conventional, protective, smart, and intelligent clothing. This applies in particular to aspects of health protection and protection against the negative impact of the environment on human health. The main objective of this Special Issue includes but is not limited to advanced materials for clothing and their properties, design and computer construction of clothing, process parameters of textile and garment production, textile and garment production, principles and applications of joining techniques of garment using thermal connecting by conduction and convection, ultrasonic and high frequency techniques, wearable computers, conventional and protective clothing, smart textile and clothing, intelligent clothing, textile and clothing engineering, and test and measurement techniques in textile and clothing engineering.

I expect great interest in these new, modern topics and contributions from your research and knowledge, because of the importance of a multidisciplinary approach to the topics.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers fourteen comprehensive topics: Biomaterials; Energy Materials; Composites; Structure Analysis; Porous Materials; Manufacturing Processes; Advanced Nanomaterials; Smart Materials; Thin Films; Catalytic Materials; Carbon Materials; Materials Chemistry; Materials Physics; Optics and Photonics; Corrosion; Building Materials. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles.

*Materials* provides an unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:**—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed by the [Science Citation Index Expanded](#) (Web of Science), [Ei Compendex](#) and [other databases](#). Citations available in [PubMed](#), full-text archived in [PubMed Central](#).

**CiteScore** (2019 Scopus data): **3.5**, which equals rank 173/460 in 'General Materials Science'.
