

The concept of **OUT OF BALANCE** deals with the fact that the world in which we live **shapes our identity** and personal evolution inevitably. Everyday we meet and deal with a multitude of different identities and roles: we face the public life creating and adapting our **social identities**; our body and aesthetic tastes modify and are modified by our physical and sexual identities; our whole being evolves as well as contemporary cultures and modern cities do. We invite artists to explore the concepts of **Entropy, Disorders, Obsessions**: entropy is conceptually defined as the measure of the level of disorder in a changing system. Starting from this **fascinating concept**, each person can be considered as a changing system, as the same as for a specific culture, city or country, until the whole universe. These continue changes find in the inevitability of evolution their measure of order.
