# SCIENTIFIC LECTURE

Entitled

## Textile testing from hosiery products to non-standard clothing comfort measurement

by

**Izabela Jasińska, PhD**

**on Thursday, December 15<sup>th</sup>, 2022 at 12:30 AM**

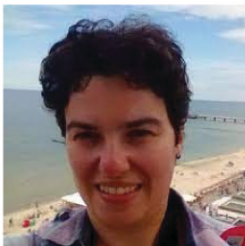

in lecture hall **A-301**, Prilaz baruna Filipovića 28a, Zagreb

### Abstract:

The measuring techniques for comfort of hosiery and upholstery products will be presented. Test methods for hosiery include both the standard method and the unique method developed in **Łukasiewicz – Łodz Institute of Technology**. Methods for evaluation of clothing comfort will be presented, including test under dynamic conditions involving participants. The unique devices for biophysical comfort assessment, developed in research projects will be presented as well. The state of acoustic properties of textile products, but not limited to them, is also the subject of the presentation.

### Biography:

**Izabela Jasińska**, PhD Eng graduated from Technical University of Lodz, Faculty of Material Technologies and Textile Design in 2004 in the field of textile science, specialization - clothing technology. In 2012, she gains PhD diploma focused on elaboration of new method for pilling assessment using image analysis tools. Her research experience covers textile testing methods and image analysis tools used to determine textile properties. Currently she works in the Textile Centre of **Łukasiewicz – Łodz Institute of Technology**.
